

(DE) Garden Structured Water Unit Installation:

1. Installation should comply with the requirements of AS 3500 and be installed by a qualified plumber.
2. The Garden Unit may be threaded easily onto a standard garden faucet and a standard garden hose.
3. Water pressure up to 2000 kPa (300 psi)
4. Avoid dropping this unit as it may result in impaired function.

Note:

When using the Garden Unit for drinking water, a white, non-toxic hose is recommended. This white hose is available from camping, RV, and most hardware stores..

Warranty:

This unit comes with a 20 year Manufacturing Warranty against manufacturer defects. Misuse of the unit is not covered. Avoid leaving this unit in freezing temperatures with residual water inside and avoid running boiling water through it continuously as impaired function may result.
