

## (DE) Shower Structured Water Unit Installation:

1. Installation should comply with the requirements of AS 3500 and be installed by a qualified plumber.
2. Remove existing showerhead and install the shower unit and place the showerhead to the shower unit.
3. Water pressure up to 2000 kPa (300 psi)
4. Avoid dropping this unit as it may result in impaired function.

### **Note:**

Your unit comes pre-wrapped with white plumber's tape ready for installation. Leave this on for leak-proof operation. Some plumbing fixtures may require additional tape.

### **If too low:**

If the showerhead is too low, it may be necessary to purchase an extension shower arm or adjustable shower adapter.

### **Warranty:**

This unit comes with a 20 year Manufacturing Warranty against manufacturer defects. Misuse of the unit is not covered. Avoid leaving this unit in freezing temperatures with residual water inside and avoid running boiling water through it continuously as impaired function may result.
